Message
Effective Jan 1, 2007 rental rates for water heaters and sentinel lights are increasing. Please visit our website or call our Call Centre for details.

Explanation of Electricity Terms on Your Bill	
<p>Electricity: This is the cost of the electricity supplied to you during this billing period and is the part of the bill that is subject to competition. The electricity consumed is multiplied by the adjustment factor *. Veridian Connections collects this money and pays this amount directly to our suppliers.</p> <p>* Adjustment Factor: When electricity is delivered over a power line, it is normal for a small amount of power to be consumed or lost as heat. Equipment such as wires and transformers consume power before it gets to your home or business. The adjustment factor accounts for these losses.</p> <p>Regulatory Charges: Regulatory Charges are the costs of administering the wholesale electricity system and maintaining the reliability of the provincial grid.</p>	<p>Delivery: These are the costs of delivering electricity from the generator to Veridian Connections Inc. Then to your home or business. This includes the cost to build and maintain the transmission and distribution lines, towers and poles, and operate provincial and local electricity systems. A portion of these charges are fixed and do not change from month to month. The rest are variable and increase depending on the amount of electricity that you use.</p> <p>Debt Retirement Charge: The Debt Retirement Charge pays down the debt of the former Ontario Hydro.</p>
